

### ON THE FLOOR INFRONT OF STAGE (or a low table):

- 1 x **Pioneer DJM900** connected to the FOH console.
- 2 x **Pioneer CDJ2000** CD players connected to Pioneer DJM900.
- 2 x **Technics 1210** record players connected to Pioneer DJM900.
- 1 x **WIRELESS DPA headset mic 4066/4088** connected to FOH.
- 1 x power outlet with 6 European power plugs 220V
- Stereo monitors connected to DJM900 BOOTH

Leave plenty of space behind equipment for children to access!

Everything goes through the Pioneer DJM900 - Rumpistol is only sending 1 stereo output (DJM900) and the mic-signal to FOH. Note that the mic has to be connected to a wireless device!

At the beginning of sound check, all equipment must be set up and fully functional.

A professional sound engineer and light technician must be at disposal during set up, sound check, and performance at all times.
